Meage, writes in the records of Made Hemospathic Medical Ac-tion. Bististics prove that with drance in knowledge and in-red ability to fight disease the av-length of life is increasing. Fifty ors ago the average length of he man life was 25 years. Today the average is \$0. On that basis it will be 65 years in 1924, and in 1950 it will be

Copper Exports Show Incresse. Washington. — With sales abroad steadily increasing, exports of copper from the United States during the six months ending with March last, to-taled 495,000,000 pounds, according to the Department of Commerce. The exports equaled the total exports for the lendar year 1906 and one and onehalf times the exports for 1902. In every instance, says the department, exports of copper pigs and bars have been larger during each of the past six menths than in the corresponding peried of last year.

MODEL MAN NEVER SAW EVIL

Famous Twin Lived 96 Years Near New York City, But Stayed Away. Babylon, L. I.-Samuel Muncle, ninety-six years old. one of the famous Muncle twins of Babylon, is dead, having gone through life with his broth-William, bearing no evil, seeking no evil, speaking none. He never

drank, chewed or smoked, never went to a theater or saw a show of any kind, except church festivals, and when he wanted amusement usually painted the barn. Some time ago the twins became known through the country as the beartiest, oldest twins on record. Born Christmas, 1818, they lived and worked together on adjoining farms.

ever played checkers. He snorted "No, sir, I never waste my time." Although within almost walking distance, he never saw New York. Once he drove to Brooklyn, but found the place too bustling and noisy. That was back in 1839, and he never felt another call to wander from Babylon.

They never quarreled and pever

played. Once Samuel was asked if he

TIMBER USED IN MINES.

About One-fourth Timber Cut In Colorado Consumed by Mining.

Denver.-Approximately one-fourth of the timber cut in Colorado is consumed by the state's mining industry, says the Department of Agriculture in a bulletin issued on Rocky Mountain mine timbers. The total annual consumption of timber of Colorado for mining purposes is about 51,600,000 board feet, valued at something like

Lodgepole pine, or white pine as it is sometimes called locally, is the timber most used, with Engelmann or white spruce next. Douglas fir, the so-called red spruce of the Rocky Meuntain region, was once the favorite wood for mines, but its growing scarcity has brought the two other woods into prominence.

Fire-killed 'odgepole pine and Englemann spruce, of which there is a great quantity in the Rocky Mountains, ought to give satisfactory service in mines, says the department, provided it is free from decay. Beams cut from dead for about thirty years showed a strength, when tested by the department, intermediate between that of gren and of air-dried material cut from live timber. Drying increases the strength and stiffness of the wood, but decreases its toughness.

Attention is called by the depart ment to the possibility of using preservative treatments to prevent decay of timber when set in the mines. As a general rule such treatment, if properly applied, will work for economy in the long run.

AISE BEAKS ON DRY FARM mythuset Adopted to Grep —Its Food Value.

It in the year 1917. A lady is al ting to a large city grocery to Have you any cannot baled bear the acts the salesting. "The l the asis the salesman. "The best made, and two cents cheaper, too," he replies, producing a can. The striking label on the can catches the lady's eye immediately and she takes it for a closer examination. "Arizona baked beans," she reads over a picturesque lithograph of an indian drassed in full regalia. "Grown by the Papage Indians in Arizona for hundreds of years—a real American product." "This isn't the old Boston brand that I have been buying, but I will try it," she says. Two days later she orders a dozen cans.

later she orders a dosen cans.

This access multiplied several thousand fold will take place in many parts of the United States in 1917, if the predictions of Prof. C. F. Presthe predictions of Prof. C. F. Free man, plant breeder of the Arisons Agricultural Experiment Station, are realised. Thousands of acres of dry-farming land are adapted to the profit able production of this native bean which promises to become one of the staple crops of Arizons. The farmers of the semi-arid Southwest will not realize the full worth of the Tepary bean until its excellent food value is bean until its excellent food value is more widely known. Being a dry-land bean it naturally is somewhat harder, heavier and requires a little longer to cook than the ordinary pink bean On the other hand, in cooking, it swells more so that in the end it is just as light and mealy as the navy. A given weight of teparies will pro duce 40 per cent more cooked beans than the same weight of either Michigan or New York grown product. Two pounds of teparies will there-fore go about as far as three pounds of other sorts in Mling cans or hun gry mouths. This more than offsets the slightly greater length of time re quired to soak them. All beans should he soaked in water about twelve hours before cooking. Chemical analysis shows the tepary to be equal in food value to other sorts of beans. It is a little higher in fast oils and starches, and a little lower in crude fiber and protein than the common pink bean.

GOOD TILLAGE IN ORCHARDS It Will Maintain Sufficient Supply o

Moisture and Will Make Plant Food Available.

(By C. L. LEWIS, Oregon Experimen

Some of the reasons for tillage is an orchard are: To maintain a suffi cient supply of moisture and to make available the plant food there is in the soil, so that trees can obtain this food; by pulverizing the soil a much greater feeding area is presented for the rootlets of the trees; by pulverising this soil deeply in the spring of the year we also get additional rootholding area for the plants. Tillage also has considerable to do with the moisture content of the orchard soils. By the spring plowing and harrowing of the ground we are apt to have less extremes of temperature, the ground is apt to become warmer, and is placed in such condition that the roots can begin their activity and top growth begin early. For this reason at times early tillage.

Tillage in the spring of the year inthe soil. It places the soil in such condition that it can catch the spring rains and hold them for tree growth. Later on in the summer the frequent shallow cultivations will check the rapid evaporation of moisture from the

condition that the trees can use it. It By the amendment its seeks to make aids in hastening decomposition of all its original petition cover not only the the soil and tends to set plant foods to forever stop the city from cutting of all kinds free so that they will dis- the rates below its present leaflet solve and in that form or solution can schedule. enter the roots of the trees.

Advantage of Pit Sile.

The round pit silo has many advantages for the dry-land farmer. Every one can afford it. It costs, with cemented walls, about one-tenth as much as a silo of the same capacity built above ground. Built without cement it costs labor only. It does not blow down. The silage never freezes and it comes warm from the silo. A cutter costs less because no blower is needed, and it takes less power to run a material falls down instead of having to be elevated.

Keeping Live Stock.

A beginner on western prairie should be careful to keep the kind of stock that will make the best use of the wild feed and easiest grown fodders. Sheep and cattle will beat hogs at this, and generally sheep will beat cattle, as they make better use of weeds and grasses found growing than any other animal.

Soil for Cauliflower.

Cauliflower does best on a well compacted soil. Its roots run very close to the surface, and in ground anywise porous it will dry out readily during hot weather and the plant consequently suffer for want of moisture While it is important to keep the surface quite mellow, the layer just be low the roots should be reasonably

line Miller, Apr. 30, 1913. Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-

card "Cuticura, Dept. L. Boston."-Adv. Napoleon at Elba. One hundred years ago Napoleon

of Elba, of which he had been made sovereign by the allies. He was received with shouts of joy by the Elban population, who were proud of the sovereign whom the chances of fortune had just thrown upon their shores. The former dictator of Europe proceeded to organize his little island realm with the same care and, as it proved, with the same purpose of aggrandizement he had bestowed on the empire he had forfeited. During the nine months that he remained watching him, and he was watching the world. The suspicion that Elba would yet develop a political volcano was general, and, as events proved,

The World's Library.

was well founded

It is computed that the total number of printed books in the world is no less than 11,638,810, and that about president; Alonzo Wiley, vice presi- 8,714,000 of these had been published subsequently to the year 1800. From urer; M. H. Ropkey trustee; Charles 1,500 to 1535 the number of books produced annually averaged only 1,250 Thorson, doorkeeper; F. L. Pferde It was not until 1700 that the annual average passed 10,000, and it was not to the International Typographical until 1887 that it reached 100,000. From 1980 to 1908, however, the annual output averaged 174,375-exactly 140 times the average output between 1500 and 1535

> DID THE WORK Grew Strong on Right Food.

You can't grow strong by merely exercising. You must have food-the kind you can digest and assimilate. Unless the food you eat is digested it adds to the burden the digestive organs have naturally to carry. This often means a nervous breakdown. "About a year ago," writes a Mass. lady, "I had quite a serious nervous

breakdown caused, as I believed, by overwork and worry. I also suffered untold misery from dyspepsia. "First I gave up my position, then I tried to find a remedy for my troubles, something that would make me well and strong, something to rest my tired stomach and build up my worn-out

perves and brain. "I tried one kind of medicine after another, but nothing seemed to help

"Finally a friend suggested change of food and recommended Grape-Nuts. of food and recommended Grape-Nuts.
With little or no faith in it, I tried a CARTER'S LITTLE
package. That was eight months ago LIVER PULS package. That was eight without it

"Grape-Nuts did the work. It helps me grow strong and well. Grape-N put new life into me, built up my whole system and made another wom-an of me!"
